

I am writing in support of XM satellite radio and against HR 4026. HR 4026 tries to restrict satellite radio companies from providing weather, traffic and other services. I believe this is illegal and unfair. There is no reason why these satellite companies should be restricted from providing these services. I travel a lot, and I depend on XM radio for all my news. I pay for the services XM provides. No other radio station can provide the services I get from XM satellite radio.

I strongly oppose HR 4026.

Thanks.

M. Villarreal, M.D.
